

Visit Finland

VF monthly follow up

February and winter season 2023-2024

Summary

Travel to Finland and to the Nordics compared to previous year and pre-pandemic

- Foreign visitors made **4.7 million trips** to Finland during the **latest 12 months** (March 2023 – February 2024) and they **spent nearly 3.8 billion euros in Finland**. **Median length of stay** was **4 nights** and **73%** of the visitors were travelling for **leisure purposes**.
 - **Leisure travellers** tend to reserve their trips to Finland **earlier for the winter holidays** than for the summer. The **average spend per trip** was also clearly **higher in winter** even though the **median length of stay** was **longer during the summer months**.
- **Number of registered foreign overnights** in **Jan-Feb 2024** were **10% above** the figures of previous year, and due to **record high February**, only *4% below pre-pandemic*.
- During the **high winter season** (Dec-Feb), foreign registered overnights **increased by 10%** compared to previous winter, and **Lapland continued to make new records**.
- Comparison with **the other Nordic countries** shows that Finland's share of overnights during the **winter season** remains among the biggest with Sweden. As in Finland, **overnights for the winter season increased** also to **Sweden, Norway, and Denmark**.
 - On the other hand, **Finland's market share for the summer season** was **among the smallest** within the Nordic countries.
- Beside registered overnights, paid accommodation includes also overnight stays in **short-term rentals**. The share of foreign overnights in **short-term rentals** of the paid accommodation varies **between 24% - 37% depending on the month**, so overnights in the short-term rentals add up quite a big portion of the total paid overnights, and they seem to be growing as well.
- **International flight bookings to Finland** for the **summer** months of June - August 2024 show **increase of 19%** compared to 2023. Among the main source markets **USA, the Netherlands, Italy, Spain, and Austria** show *positive development also compared to 2019*.
 - Bookings to **Norway** are growing very strongly for the **summer** months.
- **Seat capacity to Finland** for June – August 2024 is 14% above 2023 level, *but still -16% compared to the pre-pandemic level*.
 - Seat capacity from **Europe, USA and Asia** is **improving** compared to previous summer.

Border Survey / Latest 12 months (March 2023 – February 2024)

Foreign visitors in Finland

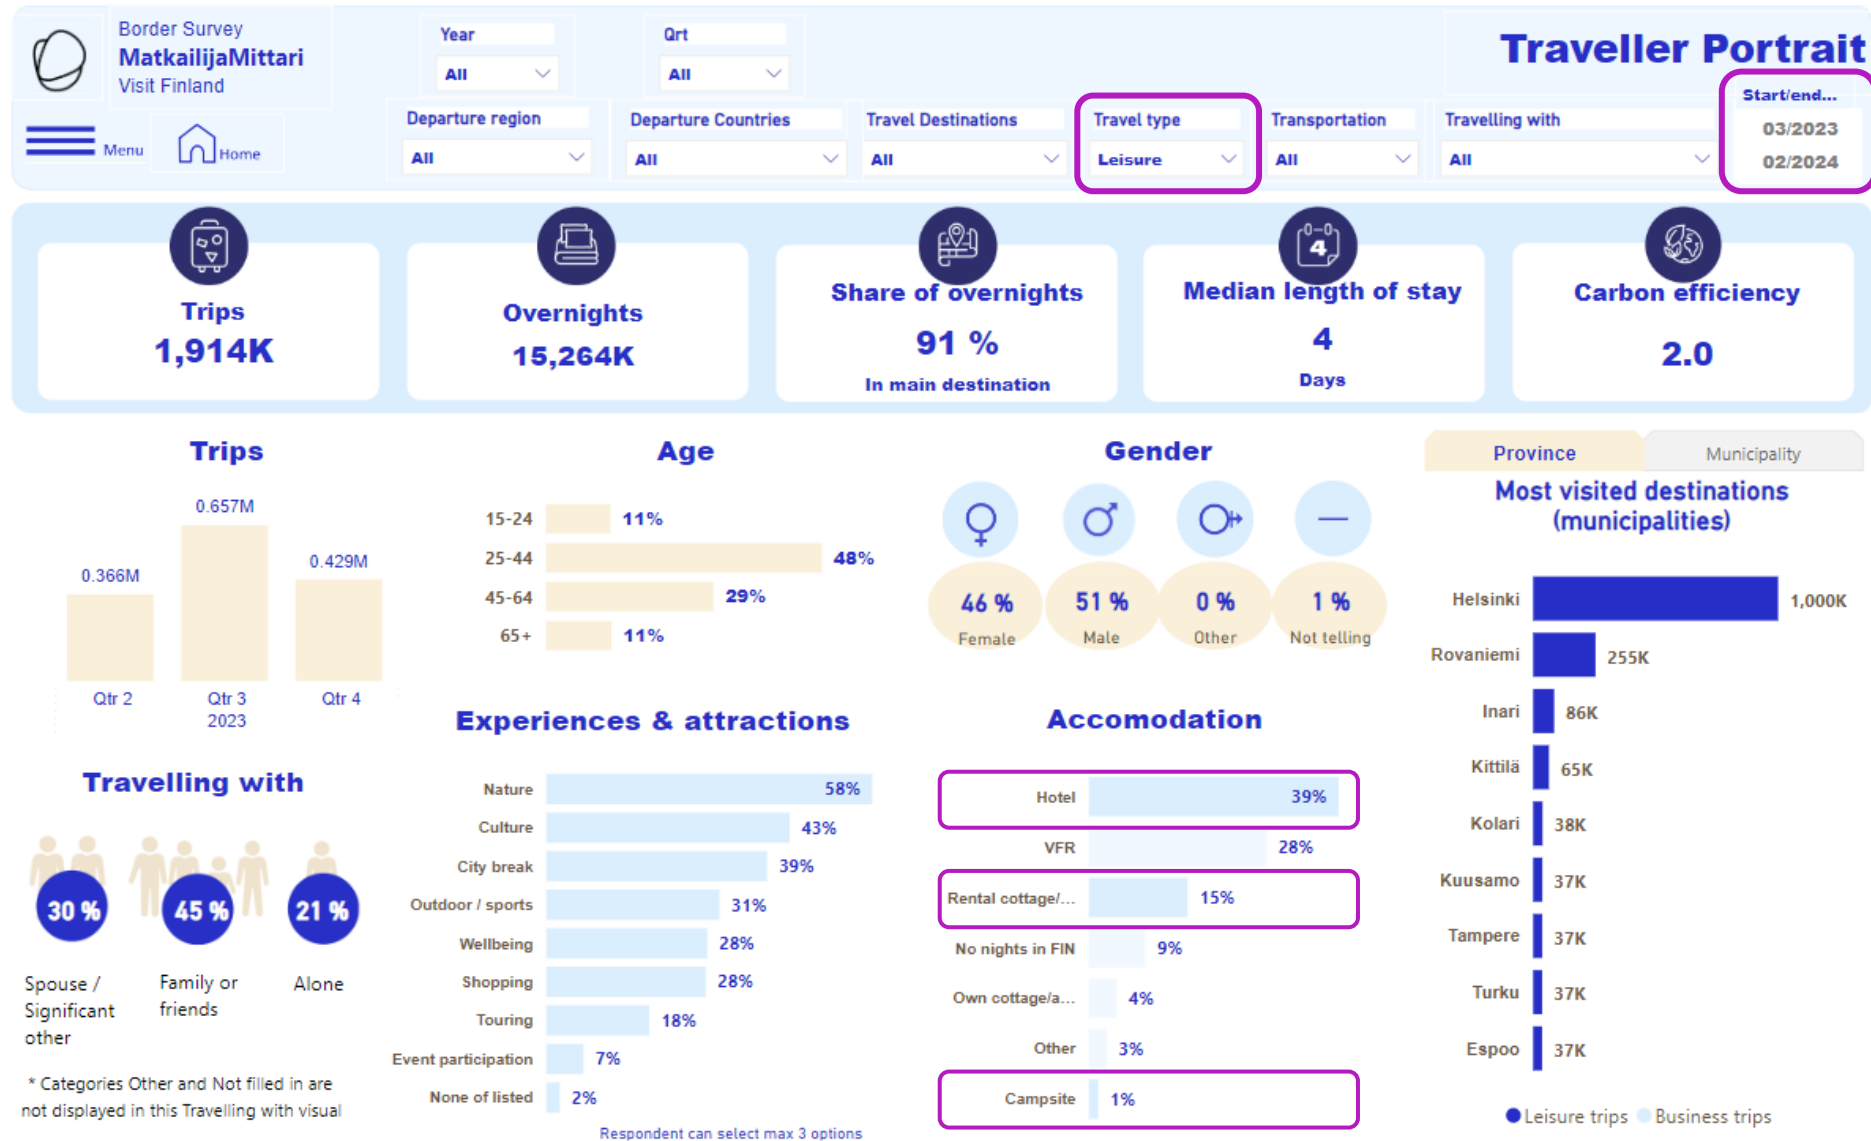

[Link to the report: Matkailijamittari - Visit Finland](#)

Leisure travellers with paid accommodation / Latest 12 months

(March 2023 – February 2024 with overnights spent in hotels, rental cottages or campsites)

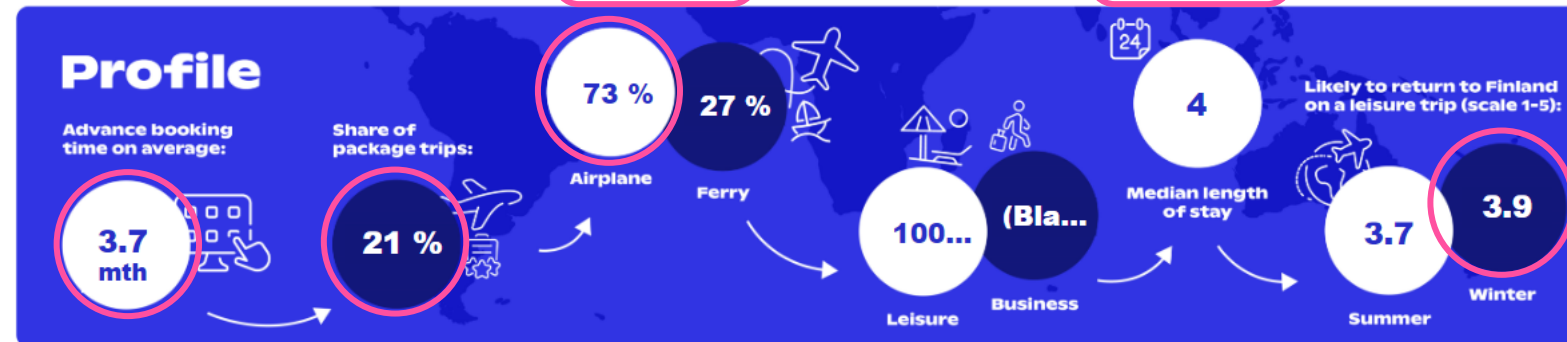

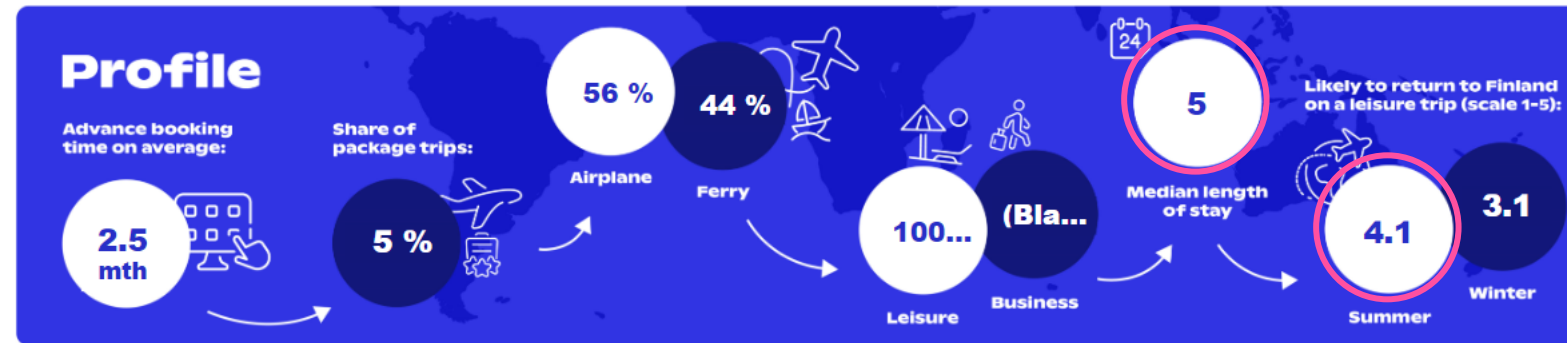

- **Traveller portrait** gives a view on travellers' profile coming from different source markets to Finland
- When focusing on leisure travellers with paid accommodation in general
 - **Helsinki** is clearly the most visited destination, followed by **Rovaniemi** and other destinations in Lapland
 - Travelling with **family or friends** is the biggest group
 - **Nearly half** of these holiday makers belong to the age group of **25-44 years**
 - Nearly 60% have had **nature experiences** during their visit. **Cultural experiences** as well as **city breaks** were also among the most common themes.

Travel Profiles for summer and winter high seasons

Foreign leisure travellers (incl. paid accommodation, visiting friends and relatives & other)

- Leisure travellers reserved their trips to Finland more than a month earlier for the winter than for the summer.
 - British and Irish leisure travellers made the reservations for December already 9 months before their holiday.
- The share of the package trips was also clearly bigger for the winter than for the summer.
- Spending in Finland per trip was 260€ higher in average during winter than in summer even though the average length of stay is slightly longer in summer.
- As the use of flights is more common in winter than in summer, carbon footprint is in average also bigger per trip in winter.
- Those visiting Finland for leisure in summer seem to be more enthusiastic of returning to Finland in summer again, while leisure travellers in winter prefer slightly more often to come back in winter as well.

OVERNIGHTS Winter season 2024

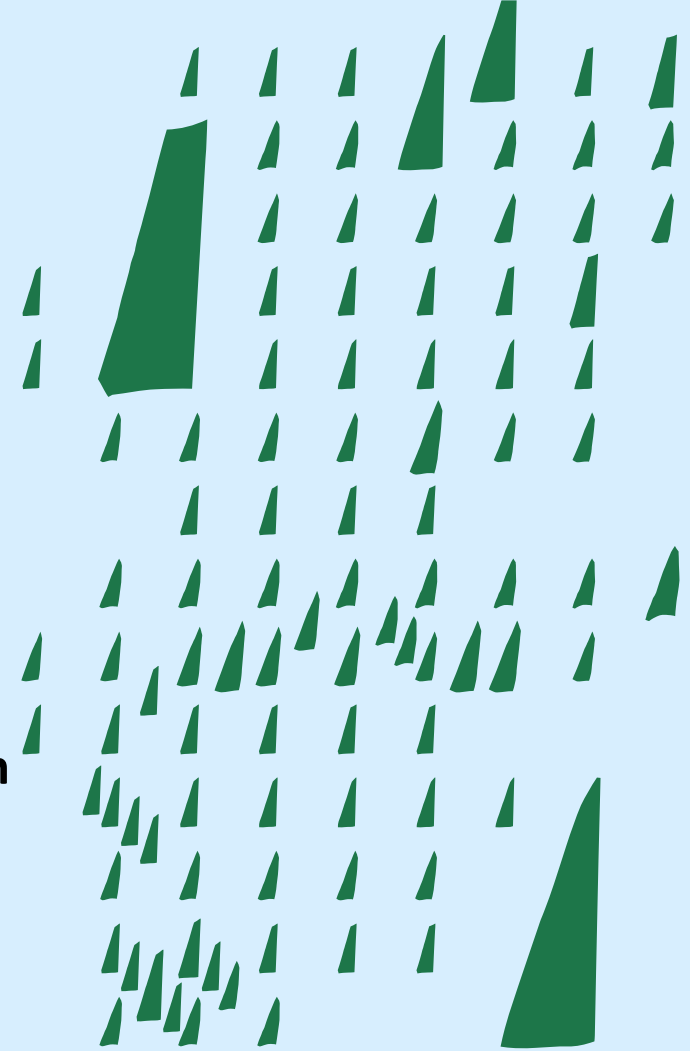

The most popular destinations in Lapland during high winter season 23-24 (vs. winter 22-23):

- Rovaniemi (+13%)
- Inari-Saariselkä (+9%)
- Kittilä-Levi (+12%)
- Kolari-Ylläs (+3%)
- Kuusamo-Ruka (+29%)
- Sodankylä (+17%)
- Muonio (+1%)

Registered overnights in the Nordics

Winter 2023-2024

- **Winter travel to the Nordic countries has developed positively** with new records of **more than 8 million overnights**. Compared to previous year, winter overnights increased in each Nordic country except in Iceland. **New winter overnight records** were made in **Sweden, Denmark, and Norway**.
- Despite the new records in winter overnights, summer is still clearly the most popular season for traveling to the Nordic countries. **Nearly half of the foreign overnights** took place in **summer months** of June-August.
- **Finland** is among the **top destinations during winter season** with a market share of **25%**. On the other hand, **Finland** stays **far away** from its closest neighbours during the **summer season** with a market share of only **7%**.

Overnights in short-term rentals

In addition to the registered overnights, also **Eurostat statistics on overnights in short-term rentals** (collaborative economy platforms, e.g. Airbnb), and **Statistics on rental cottages** (Finnish reservation platforms) give us information on overnights in paid accommodation establishments in Finland. These data tables are published in [Visit Finland Statistics Service Rudolf](#) by Statistics Finland.

- **Foreign visitors** are more active in using the short-term rentals than the Finnish travellers. The highest shares of short-term rentals of all paid accommodation can be seen in **August** and **December**, which are the popular months visiting Finland.
- **The share of foreign overnights in short-term rentals** of the paid accommodation varies between **24% - 37% depending on the month**, so overnights in the short-term rentals add up quite a big portion of the total paid overnights.
- **The use of international platforms** for short-term rentals has increased for **December, August, February, and November** even compared to 2019.
- **Helsinki** and **Rovaniemi** are clearly the most popular destinations within the short-term rentals.

Monthly total overnights in paid accommodation & share of short-term rentals

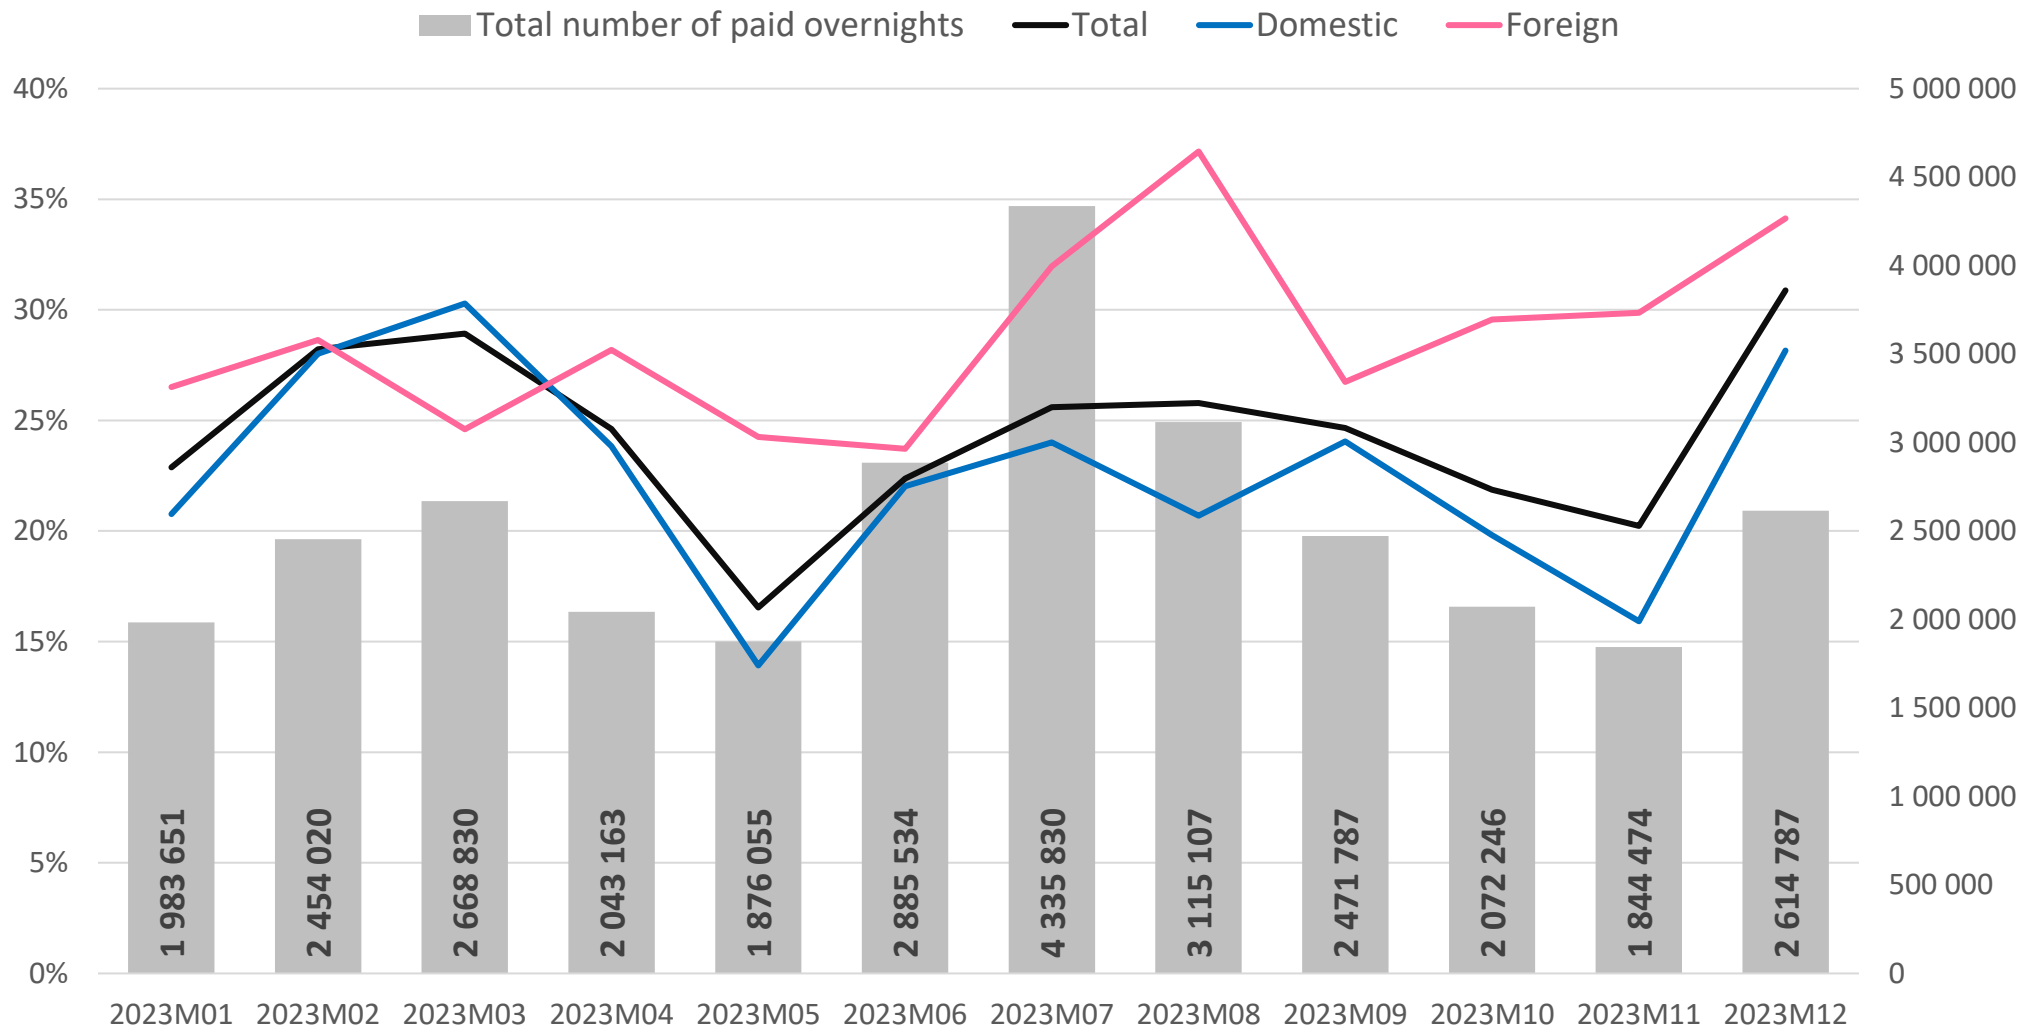

(Int'l & Finnish platforms)

Share of short-term rentals (int'l & Finnish platforms) on paid accomm.

Total number of overnights in Finland (incl. domestic & foreign overnights) is in **July** when Finnish are mainly spending their summer holidays.

However, the share of **domestic overnights** in **short-term rentals** is the highest in **March** and in **December**.

Foreign visitors are even **more active** in using the **short-term rentals** with the highest shares in **August** and in **December** which are the popular months visiting Finland.

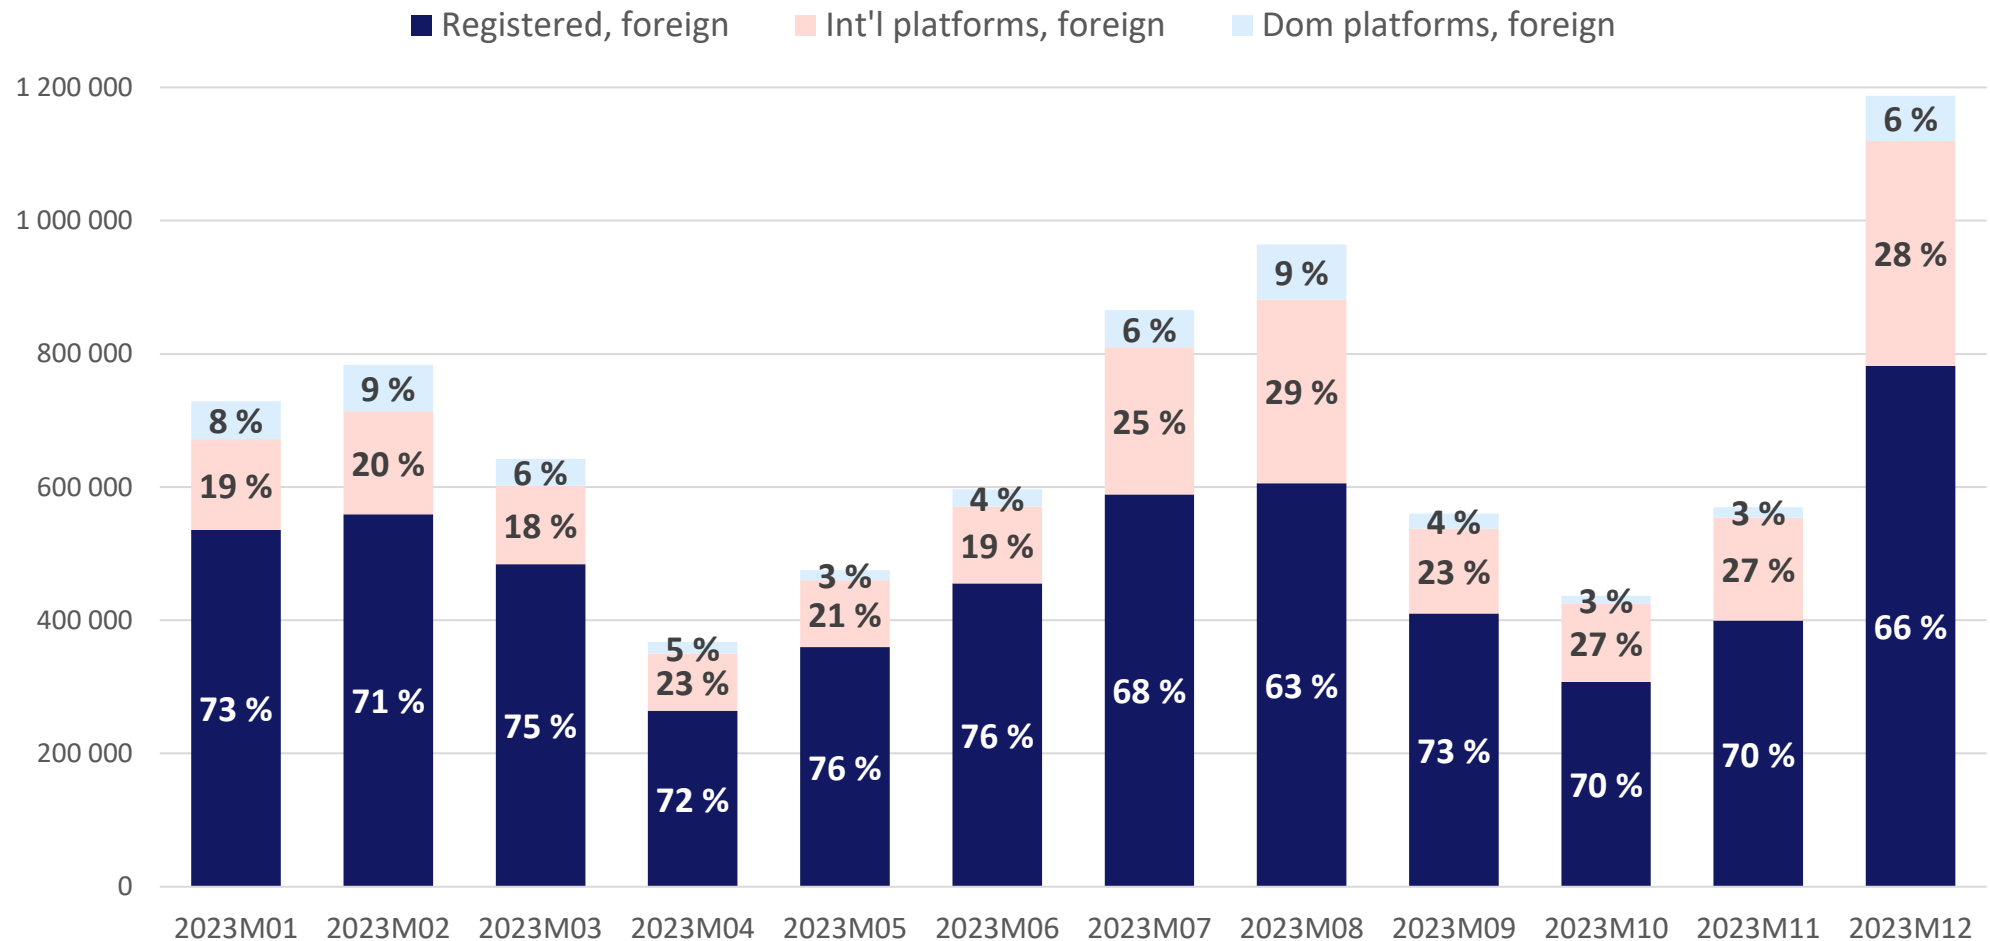

Monthly foreign overnights in paid accommodation

(Registered and int'l & Finnish platforms)

The share of **foreign overnights in short-term rentals** of the paid accommodation varies between **24% - 37%** depending on the month, so overnights in the short-term rentals add up quite a big portion of the foreign total paid overnights.

The use of **international well-known platforms** (e.g. Airbnb) is clearly more common than using the Finnish platforms (e.g. Lomarengas).

Total foreign overnights in paid accommodation

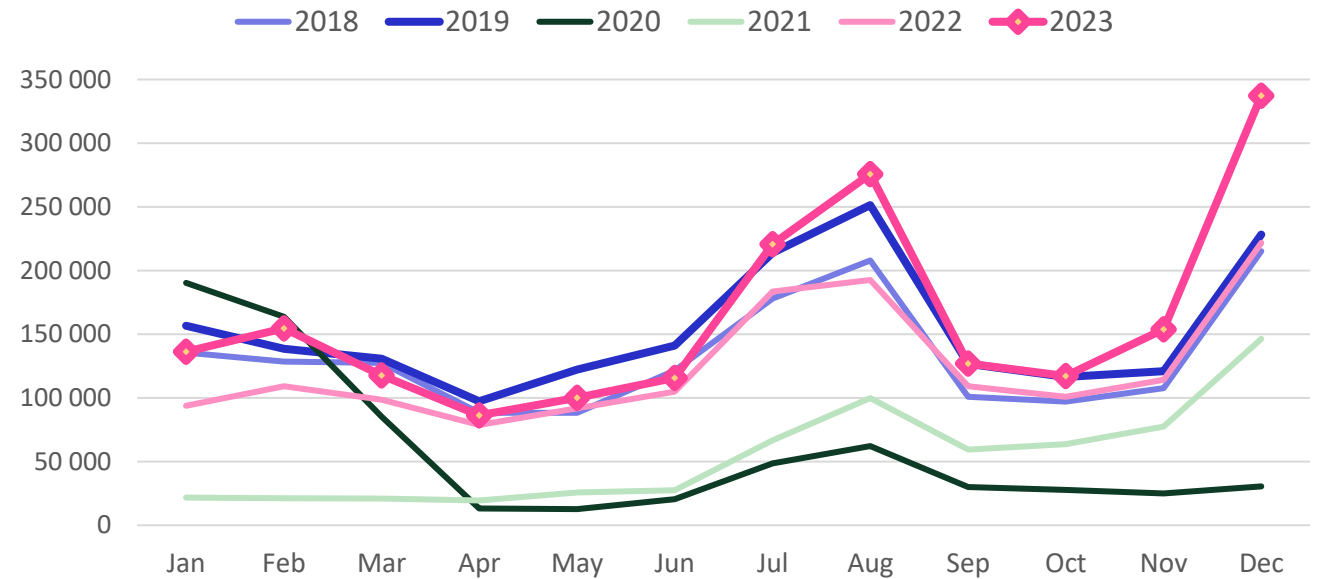

Monthly foreign overnights in short-term rentals & rental cottages

The use of **international platforms for short-term rentals** has increased for December, August, February, and November even compared to 2019.

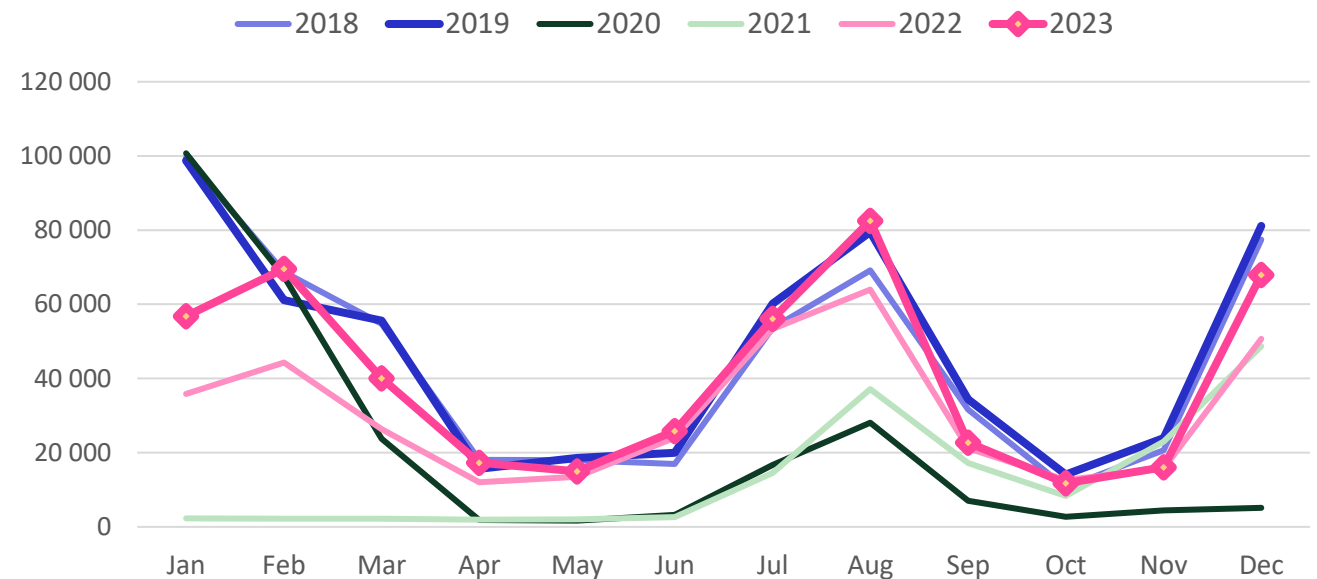

Helsinki and **Rovaniemi** are clearly the most popular destinations within the short-term rentals.

The use of Finnish platforms for rental cottages is not as common as use of the international platforms, but also in those reservation we can see the same peaks in August, February, and December.

Short-term rentals (via int'l platforms): Foreign overnights in Finland

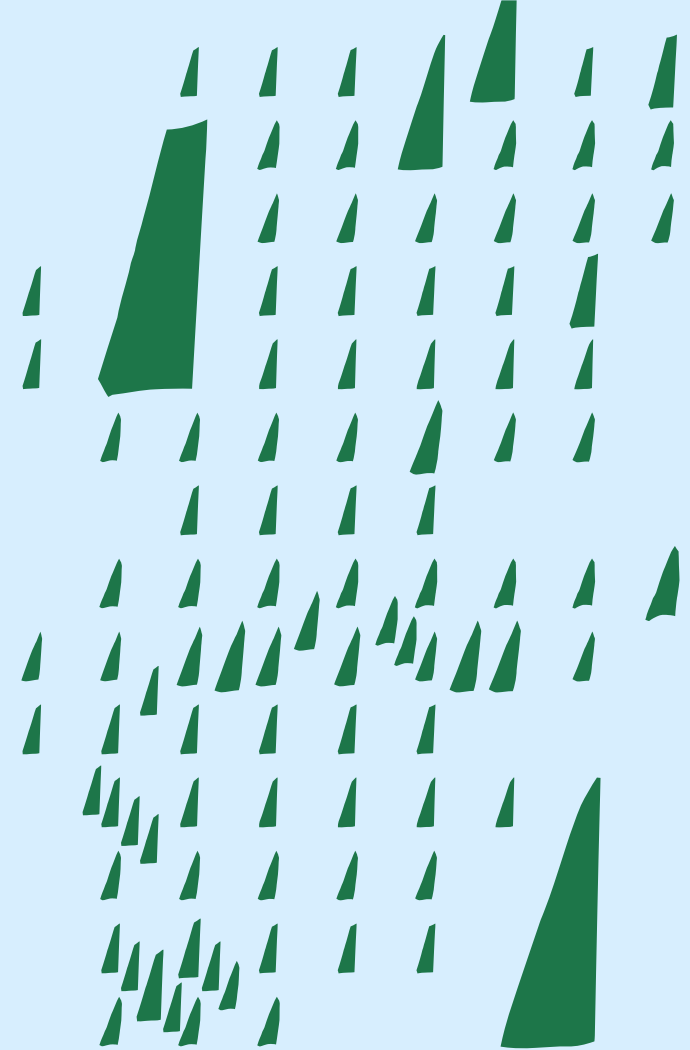

Rental cottages (via dom platforms): Foreign overnights in Finland

Flight bookings for Jun-Aug 2024

- Airline bookings for the **summer months** of June – August are **increasing compared to summer 2023**. *When comparing to summer 2019, the total int'l bookings are now at a slightly lower level. However, among the main source markets **USA, the Netherlands, Italy, Spain, and Austria** show **positive development** also compared to 2019.*
- International bookings to **Norway** continue to grow strongly also for the summer months when comparing to both to previous year as well as to summer 2019.
